DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1 and 4 are rejected under 35 U.S.C. 102(b) as being anticipated by Okada (JP411164226A).

Regarding claim 1, Okada discloses an automatic gain control amplifier (1) for controlling the amplitude of the incoming video signal based on the control step of the vertical blanking signal (4), which meets the step automatic gain control amplifier as claimed, an intermediate frequency detector (2) and AGC detector (3), which meet the means for adjusting the step automatic gain amplifier (AGC), and the AGC detector (3) inherently includes a gate for providing the detected control signal to the AGC amplifier (1) only during the vertical blanking interval.

Regarding claim 5, the intermediate frequency detector (2) meets the IF demodulation circuit as claimed.

Allowable Subject Matter

3. Claims 2-4, 6-10, and 12 are allowed.

Response to Arguments

4. Applicant's arguments filed 11/17/08 have been fully considered but they are not persuasive.

In considering applicant's argument that Okada fails to disclose a means for adjusting the step AGC that includes a gate that connects a step-controlling signal to the step AGC...the translation does not disclose that Okada disclose a step AGC, the Examiner disagrees. As stated in above rejection, Okada inherently includes a gate in the AGC detector 3 for providing the detected AGC signal to the AGC amplifier 1 in response to the vertical blanking signal generated by vertical sync detector 4. Regarding the step AGC, since the claim does not specify any detail, the step AGC is being treated as a conventional AGC, which is met by the AGC 1 of Okada.

Conclusion

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, THIS ACTION IS MADE FINAL. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
